

PPGBG Data Use Agreement

Dataset: PPGBG (v1.0)

Application contact: PPGBGa@163.com

Copyright: (c) 2026 Dataset contributors. All rights not expressly granted in this Agreement are reserved.

This Data Use Agreement governs access to and use of PPGBG. Access is granted only after approval of a completed application. The Recipient is responsible for ensuring that all covered users comply with this Agreement.

1. Definitions

"Dataset" means the PPG signals, derived windows, labels, metadata, documentation, and accompanying files distributed under the name PPGBG. "Providers" means the authors or authorized representatives controlling distribution of PPGBG. "Recipient" means the approved applicant and covered research group.

2. License

Subject to this Agreement, the Providers grant the Recipient a non-exclusive, non-transferable, revocable license to use the Dataset solely for non-commercial academic research. No ownership, sublicensing, redistribution, or public hosting right is granted.

3. Permitted Research Use

The Dataset may be used for internal academic research, model development and evaluation, methodological studies, non-clinical biomedical signal analysis, scholarly publications, theses, and aggregate statistical reporting.

4. Restrictions

1. No commercial product, commercial service, or paid data/model service may be developed without separate written authorization.
2. The Dataset must not be redistributed, published, mirrored, sublicensed, transferred, or made available to any third party.
3. No attempt may be made to identify, contact, profile, or re-identify any participant, including by linking with external data sources.
4. The Dataset and models trained from it must not be used for clinical diagnosis, treatment, triage, monitoring, or real-patient medical decision-making.
5. Copyright, license, citation, and restriction notices must not be removed or obscured.

5. Data Security

The Recipient must store the Dataset in a controlled environment, limit access to authorized users, protect copies against unauthorized access, and delete local copies when no longer required or when access is terminated. Suspected privacy or security incidents must be reported to the Providers without undue delay.

6. Publication and Citation

Public outputs may report trained models, aggregate statistics, and non-identifying results. Individual-level records, individual PPG windows, or materials enabling reconstruction of such records must not be disclosed. Works using PPGBG must cite the associated publication:

Zhang, Z., Li, J., Wang, Y., Yang, K., and Lei, T. (2026). *Dynamic Incremental Learning for Non-invasive Blood Glucose Estimation from Wearable Physiological Signals*. Manuscript under review. Preprint DOI: <https://doi.org/10.5281/zenodo.21202402>

7. No Warranty and Non-clinical Status

The Dataset is provided as is, without express or implied warranties. PPGBG is not a medical device and is not approved for clinical use. To the maximum extent permitted by law, the Providers are not liable for damages, losses, claims, or consequences arising from use of the Dataset.

8. Termination

The license terminates automatically upon breach of this Agreement. Upon termination, the Recipient must cease use of the Dataset and delete all copies under the Recipient's control. Obligations concerning redistribution, re-identification, clinical use, individual-level data, and citation survive termination.

9. Governing Law

This Agreement is governed by the laws of the People's Republic of China, without regard to conflict-of-laws rules.

PPGBG Data Access Request

This page may be completed electronically. A signed scanned copy is also acceptable. Submit the completed agreement to **PPGBGa@163.com**.
